No. 90/009,904, May 3, 2011

(57) **ABSTRACT**

Reexamination Certificate for:

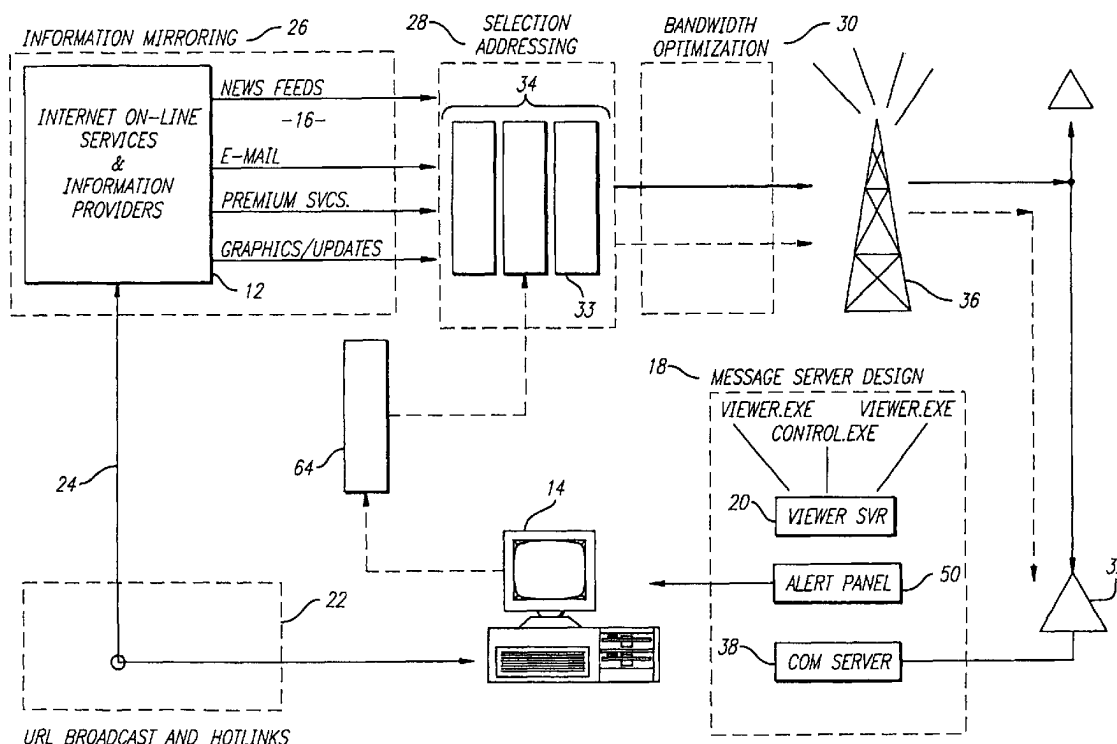

Patent No.: **6,021,433**
Issued: **Feb. 1, 2000**
Appl. No.: **08/788,613**
Filed: **Jan. 24, 1997**

A system and method for data communication connecting on-line networks with on-line and off-line computers. The present system provides for broadcast of up to the minute notification centric data thereby providing an instant call to action for users who are provided with the ability to instantaneously retrieve further detailed information. Information sources transmit data to a central broadcast server, which preprocesses the data for wireless broadcast. The notification centric portions of data are wirelessly broadcast to wireless receiving devices that are attached to computing devices. Upon receipt of the data at the computing device, the user is notified through different multimedia alerts that there is an incoming message. Wirelessly broadcast URL's, associated with the data, are embedded in data packets and provide an automated wired or wireless connection back to the information source for obtaining detailed data.

NO AMENDMENTS HAVE BEEN MADE TO
THE PATENT

AS A RESULT OF REEXAMINATION, IT HAS BEEN
DETERMINED THAT:

10

The patentability of claims **1-20, 22-25, 43-45, 47-51, 54, 64** and **66-70** is confirmed.

Claims **21, 26-42, 46, 52, 53, 55-63, 65** and **71-77** were not reexamined.
